

DOCTOR HOUCHE'S

HIGHT APPROVED BILIOUS PILLS, FOR FAMILY USE.

Prepared by John B. Houche, only, at Groton, Connecticut.

THEY have been examined and proved by many eminent physicians, in the U. S. who have all agreed in approving of them, as respects the efficacy of their cleansing qualities, and mildness in their operation. Those who have given them a faithful trial are ready at any time to certify the same.

They have never yet been known to fail to give relief in the disorders for which they are recommended in the bill of directions accompanying each box. These pills are different from the common patented ones; but are quite equal to any; and are preferable to many which have been in use a long time, for opening the passages in the stomach and bowels, carrying off the bile and nauseous impurities which often create head-aches, lowness of spirits, fever, &c. They have had a fair trial, as the testimony of many respectable persons hereunto annexed will prove, and further proof of the same can be obtained if necessary.

They are a mild, safe remedy for Bilious Fevers, Yellow Fevers, Acid Stomachs, Jaundice, Pleuritis, indigestion, Costiveness, Dysenteries, Spasms, Cholera, Eruptions on the skin, &c. In all obstructions they operate mildly and speedily, purge off all impurities, and soon give relief from obstructions in the first passages. They may with safety be given to children, which will relieve them from that feverish habit that some children are subject to, frequently occasioned by worms. Seamen, and others will find them a very excellent medicine, as they may be taken with little interruption to business, or danger of taking cold.

The public may rest assured that these Pills may be used without the least danger of any bad effects whatever, having been faithfully tried, their composition being of as mild nature as any in use.

They are equally efficacious for female complaints, cholera, &c. In short they will cleanse all the inward parts, without leaving the system relaxed, but rather braced and strengthened.

Let all those who wish to know the good effects of these Pills, give them one fair trial, and they will most assuredly find relief, in cases of a bilious complaint.

DIRECTIONS FOR TAKING THE PILLS.

The dose for an adult, is generally from two to four or five, taken in the pulp of fruit, or any mild liquid. As some constitutions are not so easily operated upon, the patient must use judgment in the number to be taken.

They may be taken at any time except immediately after a hearty meal. Care must be taken also not to eat any thing of consequence, until after the operation. As good time as any to take them is just before going to bed.

These pills are sold in tin boxes, each box containing 30 pills, *Fifty Cents* the box. The boxes are about an inch high, and an inch and a quarter diameter on the cover, and an inch and an eighth diameter on the bottom.

CERTIFICATES.

The subscribers having made use of Dr. Houche's Bilious Pills, find them to be a very mild physic, and to answer all the purposes for which they are recommended. They do not hesitate to say that said pills, in their opinion, are not inferior to any now in use, can therefore cheerfully recommend them to the public.

ROBINSON BAILEY.

In the month of April, 1815, being much unwell, in consequence of a severe cold, attended with a bad cough, having made use of many kinds of medicine, to no purpose, I at last took a portion of Dr. Houche's bilious pills, which operated gently, and gave immediate relief.

SILAS NILES.

This will certify that I was seized with a violent pain in my head and stomach, occasioned by an overcharge of bile in the stomach and bowels, which produced a shortness of breath, that laid me by from business, being very sick, finally I concluded to take four of Dr. Houche's pills, which operated gently, without griping, and cleansed my stomach and bowels completely. In 48 hours after, I was able to attend my business as usual.

ELIZABETH SMITH.

I have been unwell two years or more, with a violent pain in my head and stomach the greater of the time, which reduced me to a very low state, and gave me many disagreeable sensations which I cannot here describe. A number of physicians attended me, who gave me much medicine to no purpose. In the winter of 1815 I heard much said about Dr. Houche's Bilious Pills—I resolved to make a trial of the pills, which did, I candidly believe do me more good than all the other medicines I had taken. I have enjoyed better health ever since.

Groton, Sept. 3, 1815.
